

BULKHEAD INTERFACE PORT

Through Panel Power and Programming Ports

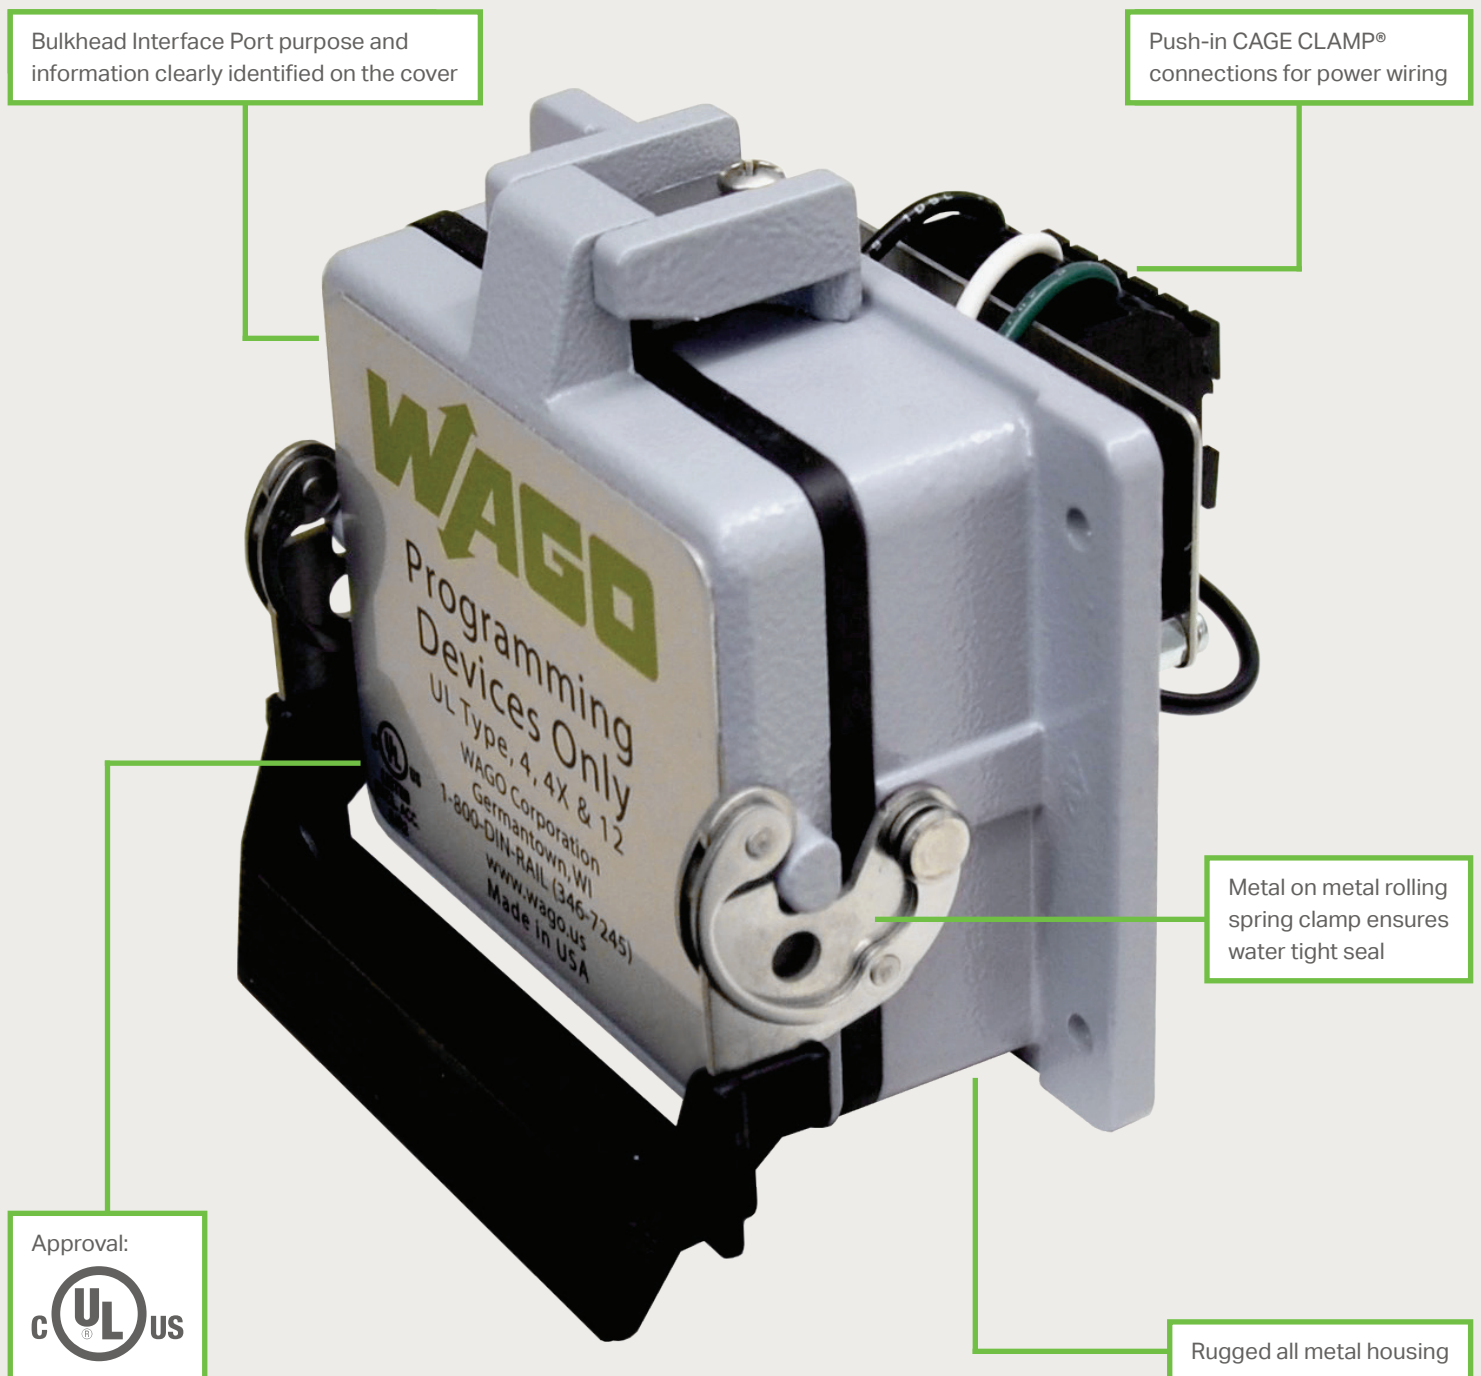

BIP SERIES - BULKHEAD INTERFACE PORT

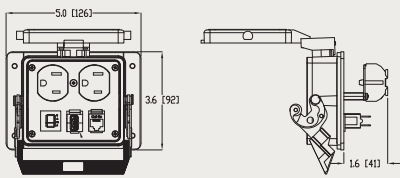

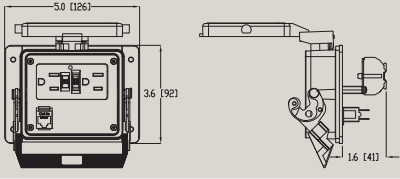

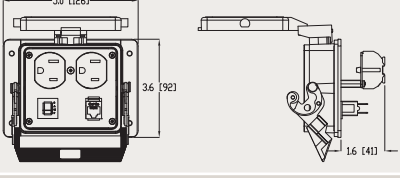

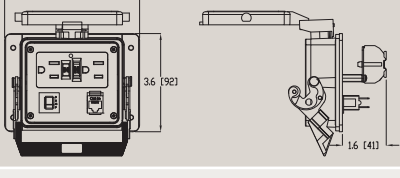

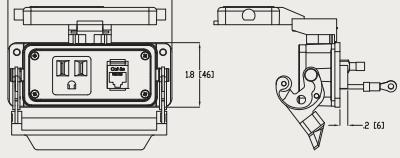

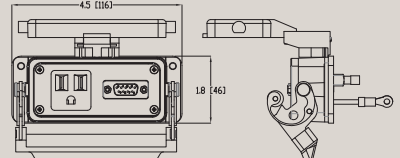

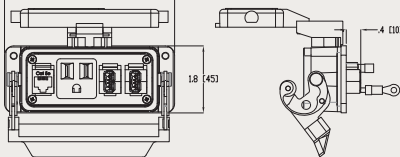

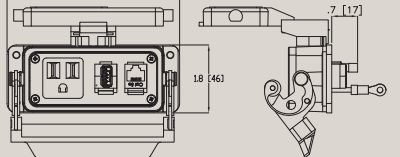

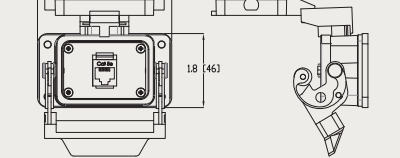

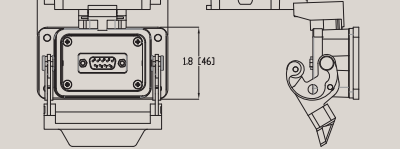

For Convenient Power Supply and Programming

Safely access high voltage panels with the Bulkhead Interface Ports. The BIP Series provide a secure gateway to your control cabinet, enabling you to plug-in to power and program without putting you or your operation at risk.

Ten different models feature a variety of connection options such as D-Sub, USB, RJ45, duplex, simplex, and GFI's to support all your power and communication needs. Push-in CAGE CLAMP® connections provide simple, reliable and tool-free wiring on the duplex models for power connections. A metal on metal spring roller latch ensures a water tight seal.

All bulkhead interface ports are encased in an all metal housing designed to withstand tough conditions and meet the safety requirements of cULus.
