

## IIOT MONITORING SOLUTION KIT

### OVERVIEW

Wireless sensors enable monitoring of equipment not previously possible. Now you can combine all of the Banner wireless sensors into one monitoring device and quickly share the data with the proper personnel. The solution is easy to install and set up, and can integrate machines that were not previously network capable.

The solution is flexible and scalable, no internet access required for most features:

- Data logging to CSV files
- Sending alerts via email or text
- Connect to local databases (MySQL, MSSQL, others)
- Connect to SCADA via OPC UA or ModbusTCP
- Push to Cloud service for back-up, analysis or sharing

- **Knowledge is key** - With real time indication of your facility or machine status sent to any electronic device, you can be assured that everything is working properly or immediate remedies can be provided to avoid further production loss.

- **Benefits -**
  - Less downtime
  - Faster changeovers
  - Predictive machine maintenance
  - Improved product quality
  - Waste Reduction
  - Lower operating costs
  - IT compliant
  - Easy to set up
  - Up to 27 sensors (expandable)

- **Automate the compliance process -**
  - Track and Trace
  - Automated Reporting
  - Data Logging

Comoso wireless monitoring solutions are designed to save your company time and money.

**Control Box \$6,957**  
**Sensors \$ 450 ea (typical)**

**Lower operating costs**

**Eliminate down time by predicting problems**
