SERIES 9Q
REED \& ELECTRONIC SENSORS FOR UNIVERSAL "T" SLOT APPLICATIONS

## General Description

The Canfield Connector Series 9 Q is a magnetic proximity switch that is engineered to fit into extruded actuators that are made with a " $T$ " slot. The unique design of the 9 Q enables it to be installed anywhere along the slot and assembled in place without taking off the actuator end-cap. The rugged polyurethane encapsulated switch features an innovative design that incorporates a hard nylon shell. The switches are available in reed or electronic sensing and feature surge suppression and on board indicator light standard. Offered as a flying lead or 8 mm quick connect, the sensors are quickly and easily wired in to any application. The sensors meet NEMA 6 / IP67 environmental specifications and are corrosion and wash-down compatible. This sensor is proudly made in the USA.
