

TANK BREATHERS

STANDARD UNITS

These devices ensure a free flow of air into hydraulic tanks or similar containers, while stopping the entry of airborne contaminants. Both 40-micron and 10-micron rated elements are offered in most models. They permit air passage at up to 25 scfm. They have NPT bases.

BF Models. Available in all-steel or nylon-base construction. The nylon-base unit is more than strong-enough, and it costs less.

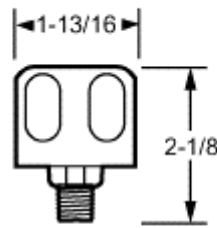

BFG MODELS. Available with a steel plated grip cap and steel base in 3/4" . Both 10 and 40 micron available.

NBF Models. These are of all-nylon construction, and have larger than usual threaded bases, up to 1-1/2 in. NPT. They can be used in ports large enough to serve also as filling openings. Stainless steel dipsticks are optional; just add "dipstick" to the model number. (They can be marked to order with "full", "add", etc., on orders of 50 or more, with a set-up charge.) A bottle thread instead of NPT is another option; add "bottle" to the model number. The bottle thread model can affect a friction fit over a 1 inch size.

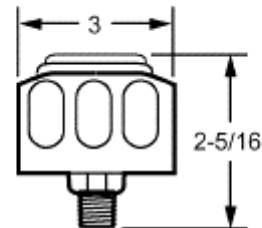

PRESSURIZED TANK BREATHER

Allows air flow to 30 cfm and available in either 10 or 40 micron with a 5 psi relief valve setting (3 psi and 10 psi available with special order). Available in 3/4" NPT with a steel base and a grip cap made of plated steel.

HOW TO ORDER - Order by Model Number in Chart Below

| TYPE | FILTER (Micron) | NPT (In.) | MODEL NUMBER |
|------------|-----------------|-----------|--------------|
| Nylon Base | 40 | 3/8 | BF-2041 |
| | | 1/2 | BF-2042 |
| | | 3/4 | BF-2043 |
| | 10 | 3/8 | BF-2011 |
| | | 1/2 | BF-2012 |
| | | 3/4 | BF-2013 |
| Steel Base | 40 | 1/4 | BF-2140 |
| | | 3/4 | BF-2143 |
| | | 3/4 | BFG-2143 |
| | 10 | 3/4 | BFGP-2143 |
| | | 3/4 | BF-2113 |
| | | 3/4 | BFG-2113 |
| | | 3/4 | BFGP-2113 |
| All Nylon* | 10 | 1/4 | NBF-2010 |
| | | 3/8 | NBF-2011 |
| | | 1/2 | NBF-2012 |
| | | 3/4 | NBF-2013 |
| | | 1 | NBF-2014 |
| | | 1-1/4 | NBF-2015 |
| 1-1/2 | NBF-2016 | | |

*Add "WP" at end of model no. for weatherproof top.
