## 55LT－Low Temperature Hose

## Features

－Twin and multi－line available
－Superior flexibility in cold temperature applications
Certifications
－Meets or Exceeds SAE 100R7

## Applications／Markets

－Hydraulic systems exposed to very low temperatures
－Excellent over－the－sheave in lift truck applications
－Cold storage or refrigerated areas
－Construction and agriculture equipment in cold climates

| Part Number | Nominal I．D． |  | $\begin{aligned} & \text { Maximum } \\ & \text { O.D. } \end{aligned}$ |  | Maximum Working Pressure |  | Minimum Bend Radius |  | Vac． Rating Hg． $773^{\circ} \mathrm{F}$ | Weight |  | Permanent Fitting Series |

## Construction

Tube：Copolyester
Reinforcement：Fiber
Cover：Copolyester

## Operating Parameters

Temperature Range：
$-70^{\circ} \mathrm{F}$ to $+212^{\circ} \mathrm{F}\left(-57^{\circ} \mathrm{C}\right.$ to $\left.+100^{\circ} \mathrm{C}\right)$
For use with water and water－based hydraulic fluids to $+135^{\circ} \mathrm{F}\left(+57^{\circ} \mathrm{C}\right)$
Change in working length＠Rated WPSI：$\pm 2 \%$
Min．Burst Pressure is 4 x Max．Working Pressure at $73^{\circ} \mathrm{F}\left(23^{\circ} \mathrm{C}\right)$

## Fittings

55 Series－pg．E－12
57 Series－pg．E－37
For Crimp Die Selection charts see pgs．G－30 ：G－41
Crimp information can be found online，for most Parker products，at www．parker．com／crimpsource

Colors
－Black

## Notes

Perforated cover
