# Series 3000 Piston Accumulators

(and 12" units at 2,000 PSI)

IN THIS SECTION						
Overview	29					
Specifications & Options	30					
Models, Capacities & Dimensi						
Series 3000	32					
Series 2000 (12" bore only)	33					
Port Options	34					
Parts & Accessories	35					
Ordering Information	36					

#### **Features**

- Heavy Duty Service with 3000 PSI Operating Pressure
- 3" thru 12" Bores with More Than 50 Standard Capacities
- V-O-ring Piston Seals
- Serviceable Threaded End Construction
- Five Standard Seal Options to Handle a Variety of Fluids and Temperatures
- ASME/DNV/ABS/AS1210/ SELO/CRN/GOST/CE Certifications Available
- Temperature Ranges -45° to 320°F

#### **Materials**

- Shell high strength alloy steel
- Caps steel
- Pistons aluminum (3" thru 7"), ductile iron (9" & 12")
- Gas Valve Cartridge steel
- Gas Valve Protector steel
- Piston Glide Rings PTFE
- Piston & End Seals various polymers
- Piston Seal Backups PTFE

#### **Actual Bore Sizes & Maximum Flow Rates**

Nominal	Actual B	ore Size	Max. Recomm	nended Flow*
Bore Size (in)	(in)	(mm)	GPM	LPM
3	3.00	76.20	220	834
4	4.03	102.4	397	1504
6	5.78	146.9	818	3096
7	7.00	177.8	1199	4538
9	9.00	228.6	1982	7502
12	11.88	301.6	3450	13061

\*Note: Based on 120 in/sec maximum piston speed, port & fitting size will become limiting factors for most applications.

# **Pressure Ratings**

Parker Series 3000 piston accumulators are rated at 3000 PSI and a minimum 4 to 1 design factor. Pressures over 3000 PSI, see Series 4000 and Series 5000 accumulators. For pressures over 5000 PSI consult factory.

#### **Fluids**

Parker's piston accumulators are compatible with a wide variety of fluids. Standard accumulators (with nitrile seals) may be used with petroleum-based industrial oils or water-based flame resistant fluids. Optional seals compatible with most industrial fluids are available with temperature ranges from -45°F to 320°F (-43°C to 160°C).

## **Precharge**

Units are shipped with a nominal nitrogen precharge as standard. For specific precharge pressures, specify at the time of order

### **Auxiliary Gas Bottles**

When space does not permit the installation of the required piston accumulator, a smaller accumulator may be used by connecting it to an auxiliary gas bottle(s) that can be located in a nearby spot where space is available. In some cases, a piston accumulator and gas bottle combination may be more economical, especially large capacity sizes. Piston travel, confined to the accumulator, must be calculated with ample margins to store the required fluid.

#### **Standard Ports**

The following ports are supplied as standard on all fluid ends and on the gas end of accumulators ordered for use with gas bottles:

#### Notes

- 1) For flange dimensions, see tables below.
- 2) On standard 7" & 9" bore accumulators, both SAE Straight Thread and Flange ports are available as standard. Omit port code for SAE #32 Straight Thread, specify "PL" port code for 2" Code 61 Flange when ordering. Flange ports are recommended at operating pressures above 2000 PSI due to pressure limitations of most #32 SAE Straight Thread fittings.

		Standard	ndard Ports				
Bore	Standard	Models	Metric Models				
Size	SAE Port	SAE Flange <sup>1</sup>	BSPP Port (in)	Metric SAE Flange <sup>1</sup>			
3	#12	-	1	-			
4	#20	_	1	-			
6	#24	-	1-1/2	-			
7	#32	2" Code 61	-	2" Code 61			
9	#32	2" Code 61	-	2" Code 61			
12	_	3" Code 61	_	3" Code 61			

<sup>&</sup>lt;sup>1</sup>See flange dimensions in Port Options.

#### **Gas Valves**

Two types of gas valves are available on Series 3000 piston accumulators and gas bottles. Units with 3" thru 6" bores, are offered with a cored gas valve cartridge (ISO-4570-8V1) as standard. All 7" thru 12" bore units are supplied with a heavy-duty, high-pressure, poppet-type gas valve cartridge (L07689000K) as standard.

# **Available Options**

If your application requires a piston accumulator, gas bottle, or special option that falls outside of Parker's broad offering, consult your local distributor, Parker representative, or the factory with your specific requirements. Parker has the manufacturing and engineering expertise to design and build piston accumulators to your exacting requirements, from simple modifications of standard units to complete designs. Some example of Parker's past special designs include:

- High Pressures
- Special and Stainless Steel Materials
- Piston Position and Velocity Sensors and Switches
- Water Service
- Non-Standard Capacities
- Extreme Temperatures

# **Water Service Option (W)**

Piston accumulators are available for use with water as the fluid media. Modifications include electroless nickel plating all surfaces and metal parts. Consult factory for details.

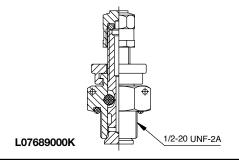

# Seal Material Options

Seal Code	Polymer	**Recommended Operating Temperature Range	Maximum Temperature with Reduced Life	General Application and Compatibility*
К	Buna- Nitrile	-20°F to 165°F -29°C to 74°C	200°F 93°C	Parker's Standard Compound – Compatible with most mineral oil-based fluids
E	Fluorocarbon Elastomer	-10°F to 250°F -23°C to 121°C	400°F 204°C	Compatible with most mineral oil-based fluids at higher temperatures and some exotic fluids
D	Ethylene Propylene	-40°F to 250°F -40°C to 121°C	300°F 149°C	Compatible with most phosphate ester fluids and some synthetic fluids
Н	Hydrogenated Nitrile	-25°F to 320°F -32°C to 160°C	350°F 177°C	Compatible with most oil-based and biodegradable fluids, maintains sealing effectiveness at a wide range of temperatures
Q	Low Temp. Nitrile	-45°F to 160°F -43°C to 71°C	200°F 93°C	Compatible with most mineral oil-based fluids and maintains sealing effectiveness at low temperatures

<sup>\*</sup>Consult local distributor or factory for fluid compatibility information.

# Gas Valve Option (M)

A heavy-duty, high-pressure, poppet-type gas valve is available on 3" through 6" bores as an option (M). Specify when ordering.

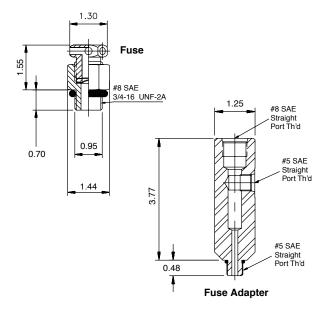

# Safety Fuse Options (F)

Safety Fuses are used as a safety device on accumulators and gas bottles to prevent over-pressurization of gas due to external heat or hydraulic pressure (set at 140% of maximum system pressure to avoid rupture disk fatigue and premature failure). The rupture disks are calibrated to rupture at a predetermined pressure. Safety fuses are available on most sizes of piston and bladder accumulators and gas bottles. Safety fuses can be installed on all piston accumulators by using the "Fuse Adapter" as shown to the right. 4" bore units and above can be equipped with a fuse port machined in the gas cap by specifying the "Safety Fuse Option" (F) at the time of order in the model code, see "How to Order." The safety fuse assembly and/or fuse adapter must be ordered separately.

Description	Part Number
Safety Fuse Assembly <sup>1</sup>	086471xxxx
Replacement Rupture Disks	756003xxxx
Fuse Adapter	1468970002

<sup>&</sup>lt;sup>1</sup> Assembly includes housing and rupture disk, xxxx = pressure setting in 100 PSI increments, i.e., for an assembly with a 2000 PSI setting, order P/N 0864712000

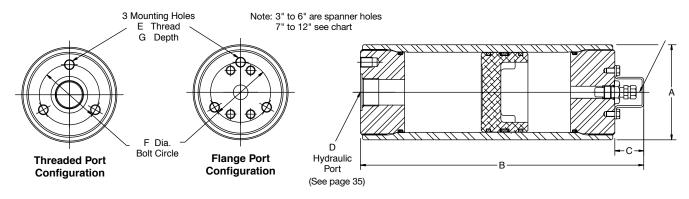

Note: ASME and CRN units available upon request.

<sup>\*\*</sup>The temperatures listed indicate the operating temperature range of the seals, not the accumulator. For the Minimum Design Metal Temperature (MDMT) of ASME certified accumulators, refer to page 31.

The Minimum Design Metal Temperature (MDMT) for ASME certified 7" and 9" piston accumulators presented in this section is 20°F (-7°C). The Minimum Design Metal Temperature (MDMT) for ASME certified 12" piston accumulators presented in this section is 32°F (0°C). Piston accumulators are available with MDMT below -40°F (-40°C). Consult factory for options.

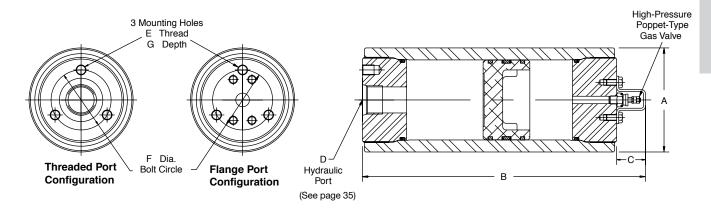

#### Notes

- For Water Service add "W" after construction code, see "How to Order" information.
- Standard accumulators are designated D1K in model number, metric are D2K.
- See "Port Options" for complete listing of standard and optional ports.
- ASME/DNV/ABS/AS1210/SELO/CRN/GOST/CE certified accumulators and gas bottles are available.
- When accumulators are to be used with gas bottles, order "Accumulators for Use with Gas Bottles."
- 3", 4" & 6" bores standard with cored gas valves.Poppet type (L07689000K) gas valve available as an option.

# 2000 PSI (139 Bar Metric) Piston Accumulators for Oil and Water Service

We offer a 2000 PSI accumulator in 12" bore size and a variety of capacities for industries where lower pressure ratings can be used.

Model No.	Fluid Vol	ume	Gas V	olume	Δ	В	С	E	F	G	Weight

#### Notes:

- For Water Service add "W" after construction code, see "How to Order" information.
- Most SAE #32 fittings are rated for 2000 PSI. If 2000 to 3000 PSI service is required, two options are available; order accumulator with optional standard 2" SAE Code 61 4-bolt flange port by specifying "PL" code when ordering or order the accumulator with a SAE #24 port or smaller. See "Port Options" for dimensions and "How to Order".
- See "Port Options" for complete listing of standard and optional ports.
- ASME/DNV/ABS/AS1210/SELO/CRN/GOST/CE certified accumulators and gas bottles are available.
- When accumulators are to be used with gas bottles, order "Accumulators for Use with Gas Bottles."
- Poppet type (L07689000K) gas valve standard.

# **Optional Ports**

The following ports are available as options on all Series 3000 piston accumulators

64	M12	50.8	88.9	64	30.1				
76	M16	61.9	106.4	76	30.1				

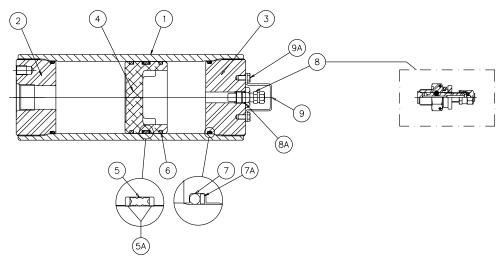

Note: Some flanges using this bolt pattern are not rated for 3000 PSI.

**Piston** 

#### **Seal Kits**

Seal Kits are available for all piston accumulator models. When ordering seal kits, please supply the complete model and serial numbers from the name plate and specify fluid type and operating temperature.

#### **Parts List**

- Body
- Hydraulic Cap 2
- 3 Gas Cap
- 4 Piston
- 5 V-O-ring Piston Seal
- **5A** V-O-ring Backups
- 6 PTFE Glide Rings
- 7 O-ring
- **7A** O-ring Backup
- 8 Gas Valve
- **8A** Gas Valve O-ring
- 9 Gas Valve Guard
- **9A** Screw

# **Mounting, Charging & Gauging Accessories**

Parker offers a wide variety of mounting, charging and gauging accessories. See "Accumulator Accessories."

## **Special Options**

If your application requires a piston accumulator, gas bottle, or special option that falls outside of Parker's broad offering, consult your local distributor, Parker representative, or the factory with your specific requirements. Parker has the manufacturing and engineering expertise to design and build piston accumulators to your exacting requirements, from simple modifications of standard units to complete designs. Some example of Parker's past special designs include:

- Large Bore
- High Pressure
- Special and Stainless Steel Materials
- Piston Position and Velocity Sensors and Switches
- Special Seals
- Non-Standard Capacities
- Tie Rod Construction
- Special Certifications
- Spring & Weight Loaded
- Extreme Temperatures

Consult the experts at Parker with your next piston accumulator requirement!

#### **How to Order Piston Accumulators**

Piston accumulators and gas bottles can be specified by using the symbols in the chart below to develop a model number. Select only those symbols that represent the features desired, and place them in the sequence indicated by the example at the top of the chart.
