Re: 77 Series Die Color – Permanent Change

In an effort to make a better distinction between the 77 series dies and the 43 series dies, we are making a running change to the 77 series die color. Currently, both the 77 series die and 43 series die are silver.

To limit confusion in the field with customers, we have decided to change the 77 series die color from silver to black effective immediately. The 43 series die color will continue to be silver. The decals, catalog, and Crimpsource will all be updated to reflect this change.

It is important to note that any 77 silver dies are form, fit, and functionally correct and do not need to be replaced. This change reflects the color of the die only.

If you have any other questions or concerns, please contact your sales representative or Hose Products Division Product Sales Manager.

Thank you for your support and business.

Doug Gilbert
Marketing Manager
