SMT8B pump series

Settima designs and manufactures hydraulic 3 screw pumps and helical rotors pumps.

Settima screw pumps, coupled together with external or immersed motors, run quietly and with no pulsations, they are used in hydraulic applications and many types of systems.

Settima screw pumps are positive displacement rotary pump with axial flow design. There are only three moving parts. The power rotor is the only driven part that extends outside the case. The idler screws act as sealing parts and are turned hydraulically by the fluid being pumped. There is only a rolling action between the drive screw and the idler ones. The rolling action eliminates noise and vibration.

Applications / applicazioni

WIND ENERGY ENERGIA EOLICA

Low pressure cooling and recirculation (pitch controls of windmill blades)

Raffreddamento a basse pressioni e ricircolo (controllo inclinazione pale mulini a vento)

Lube services (gear and gear boxes)
Lubrificazione (ingranaggi)

INDUSTRIAL INDUSTRIALE

Low pressure cooling
Raffreddamento a basse pressioni

Off-line compact cooling systems
Sistemi compatti di raffreddamento off-line

Powerpacks cooling
Raffreddamento centraline

Chillers
Raffreddamento in genere

Oil seal services (compressors, generators)
Paraolio (compressori, generatori).

Lube services (diesel engines, turbines, compressors)
Lubrificazione (motori diesel, turbine, compressori)

MOBILE MOVIMENTAZIONE

Mobile machines cooling
Raffreddamento per macchinari movimentazione terra

Filtration, low pressure recirculation
Filtrazione, ricircolo a bassa pressione

Flow media / fluidi

Flow media/fluidi

Mineral oil <i>Oli minerali</i>
Synthetic oil <i>Oli sintetici</i>
